Problem and Opportunity

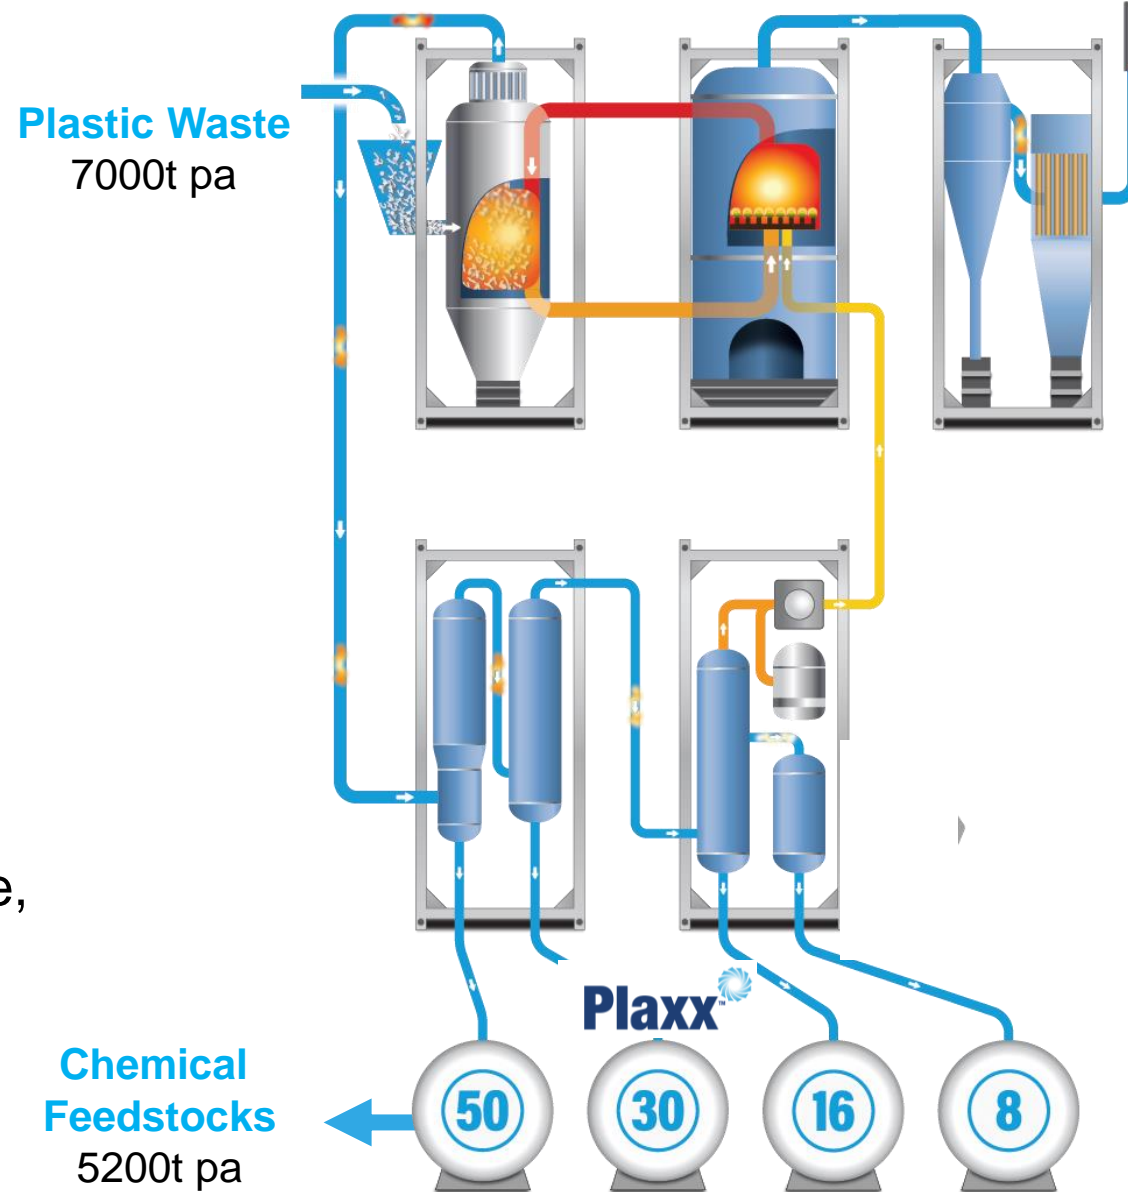

Turning off the plastic tap

Feedstock Recycling – the RT7000

CAPEX = £3.5M
Payback <3 years

- Mass Producible
- Transportable
- Globally Scalable
- Makes Waste Plastic Valuable
- Lower carbon – each tonne of plastic processed saves 1.8t CO₂e, each machine **12,600t CO₂e p.a.**

The RT7000 is able to tackle plastics currently considered unrecyclable: films, food trays, laminated plastics such as crisp packets and even black plastic.

2010

2013

2018

...Our aim is to add
10 million tonnes
of plastic waste
recycling capacity,
worldwide, by
installing 1,300
RT7000 machines
by 2027

Today

Come and join us...

“By making plastic valuable on land, it will remove the drivers for it being dumped into the oceans.”
Adrian Griffiths CEO, Interview with Leslie Hook, FT
